Tunis, Tunisie
(+216) 56 568 707

ABOUT ME

Hi , I believe that I thrive when tackling hands-on project and exploring innovative approaches to sustainability. I am eager to contribute my creativity, technical skills, and enthusiasm to collaborative projects, while challenging myself to grow beyond my current limits.

EDUCATION

- **2024 – 2027**
  ENGINEERING DIPLOMA SPECIALIZATION: ARTIFICIAL INTELLIGENCE
  Esprit- Tunisia
- **2022 – 2023**
  INTEGRATED PREPARATORY CYCLE
  Esprit- Tunisia

PROFESSIONAL EXPERIENCE

- **JUN 2025 – JUL 2025**
  Value - Tunisia

AI INTERN — TEXT EVALUATION & IMAGE RELEVANCE SYSTEM

- Designed a global radar metric using a polygon mathematical modeling with NLP to detect low-quality texts.
- Built an autonomous LLM workflow for image–text relevance and automatic image retrieval/integration.
- Integrated Groq API for real-time LLM inference and automated decision-making.

Technologies: Python, Transformers, OpenAI API, Groq API, LangChain, Matplotlib, NumPy

- **JUNE 2023**
  Tunisian Post (La Poste Tunisienne)

INTERN – COMMERCIAL POST DIVISION (HYBRID COURIER SERVICES)

- Supported daily operations of Hybrid Courier Department, improving document tracking efficiency.
- Assisted in streamlining postal workflows, reducing processing delays for clients.

ACADEMIC PROJECTS

- **SEP 2025 – DEC 2026**
  Proposed by the Tunisian Ministry of Health

SAHATEK – MULTI-AGENT AI SYSTEM FOR MEDICAL GUIDANCE

Development of an intelligent platform based on AI agents to improve patient orientation and reduce the overload of emergency services in Tunisia.

Key Achievements:

- Designed a multi-agent architecture (6 agents) using LangGraph
- Implemented a Retrieval-Augmented Generation (RAG) system to correct medical misinformation and provide reliable responses to users
- Applied NLP techniques for symptom analysis and patient guidance
- Built a conversational system using LangChain for natural user interaction

Technologies: Python, LangChain, LangGraph, RAG, NLP, LLMs , Multi agents system

- **JAN 2025 – JUN 2025**
  Among the Top 6 projects in the 3rd year AI program at ESPRIT

MARINE CONSERVATION AI INITIATIVE – DEEPSEA.AI

Contributed to a research-driven AI platform for marine ecosystem monitoring, focusing on biodiversity and environmental resilience.

Key Achievements:

- Developed a CNN-based image classification model for zooplankton species identification.
- Built a deep learning system to detect coral reef bleaching for automated environmental assessments.
- Created a Retrieval-Augmented Generation (RAG) chatbot for marine ecology research.

Technologies: PyTorch, CNN, Image Classification, RAG, LangChain, Ollama , FAISS

- **SEP 2024 – DEC 2024**

AIR QUALITY FORECASTING PLATFORM – BI & AI INTEGRATION.

- Designed a data warehouse for air quality data and created interactive Power BI dashboards to visualize pollutant patterns and trends.
- Built ML models (classification, regression, clustering) to forecast pollution levels and deployed a Django web app for real-time access.

Technologies: SSIS, SSMS, Power BI, Python, Machine Learning, Django, Web Development.

ACTIVITIES & LEADERSHIP

- **IEEE WIE & CS MEMBER** (2023 – PRESENT)
  ACTIVELY PARTICIPATED IN PROJECTS , WORKSHOPS AND COLLABORATED WITH TEAMS TO DEVELOP PRACTICAL AI AND ENGINEERING SOLUTIONS
- **DEEPFLOW TECHNICAL MEMBER** (2024 – PRESENT)
  HOST WORKSHOPS AND MENTOR STUDENTS WITHIN THE UNIVERITY CLUB ON THE FUNDAMENTALS OF AI ,MACHINE LEARNING AND DEEP LEARNING .

LANGUAGE

- Arabic — **Native**
- French — **B2**
- English — **B2**
- Deutsh — **A2**

SKILLS

- **Programming:** Python, Java, SQL, C, C++ .
- **AI / ML / DL:** TensorFlow, Keras, Scikit-learn, PyTorch, LLMs, RAG.
- **Web Development:** Django, HTML, CSS, JS, FlutterFlow, Node.js , streamlit.
- **Data & Analytics:** Power BI, SSIS, SSMS, Pandas, NumPy .
- **DevOps/Tools:** Git, GitHub, VS Code .
