Project context and Problematic

The Hidden Biological Overload

1. **1 in 5 couples globally experience infertility**

Source: World Health Organization

2. **EDC exposure costs the EU €157 billion annually.**

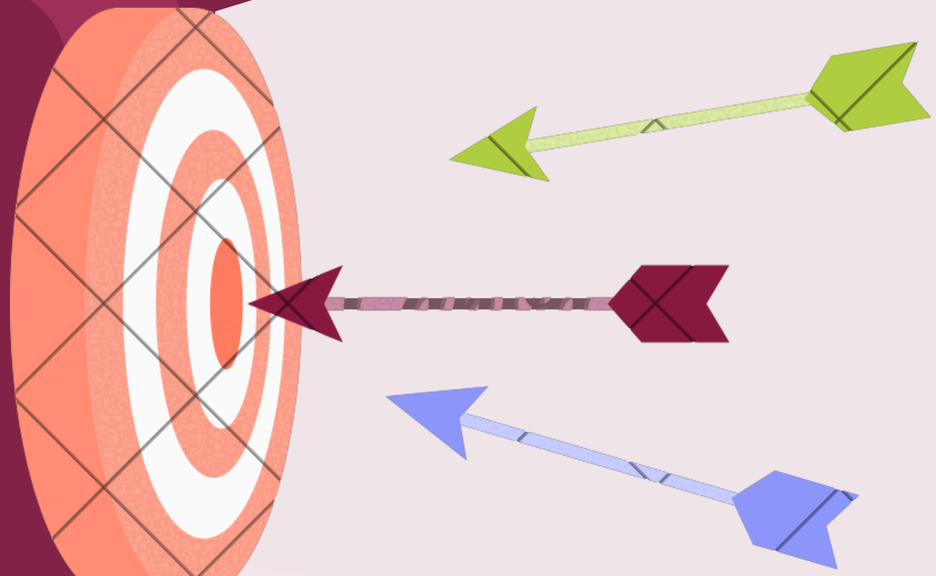

Source: European Commission

3. **PCOS affects 6–13% of women of reproductive age**

Source: European Food Safety Authority

Business Understanding

Primary Target Audience

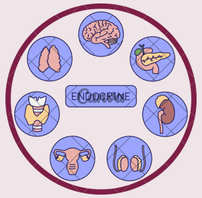

Parents (Newborns)

Pregnant Womens

PCOS/Endocrine Patient

Diabetes

Cardiovascular

Existing Solutions

Think dirty

Beauty ingredient risk scoring

EDC checker

Endocrine disruptor alert tool

INCI Beauty

Cosmetic ingredient transparency app

NutriScan

Food label health scanner

Data Providers

API

Chemicals

Profiles

Data Understanding

Data Types

Image data/ Barcode data

Scanned product images, product identification

Cumulative exposure values, Health scores, Prediction models

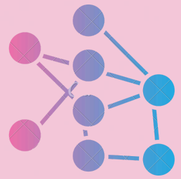

Numerical Data

Text data

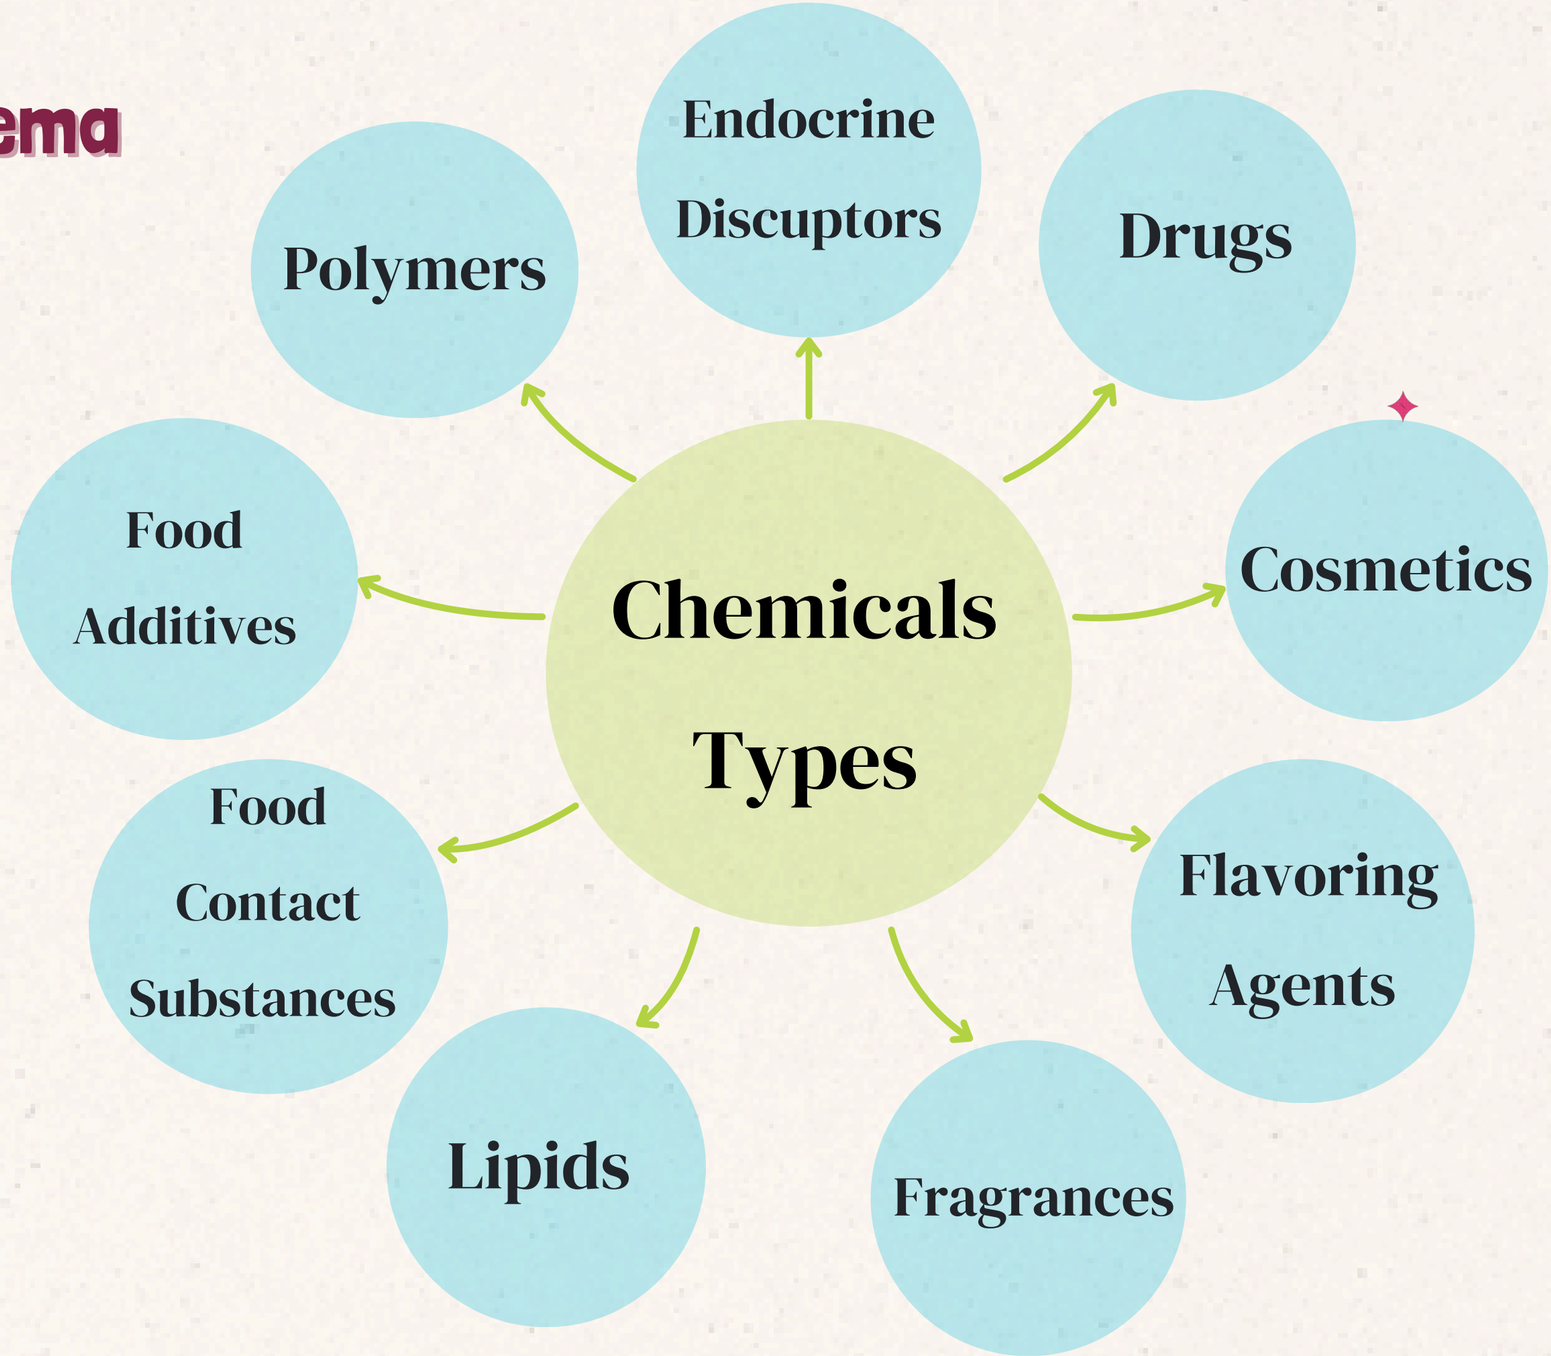

Chemical composition, ingredient properties, Health-related information

relationships between compounds, receptors, biological effects

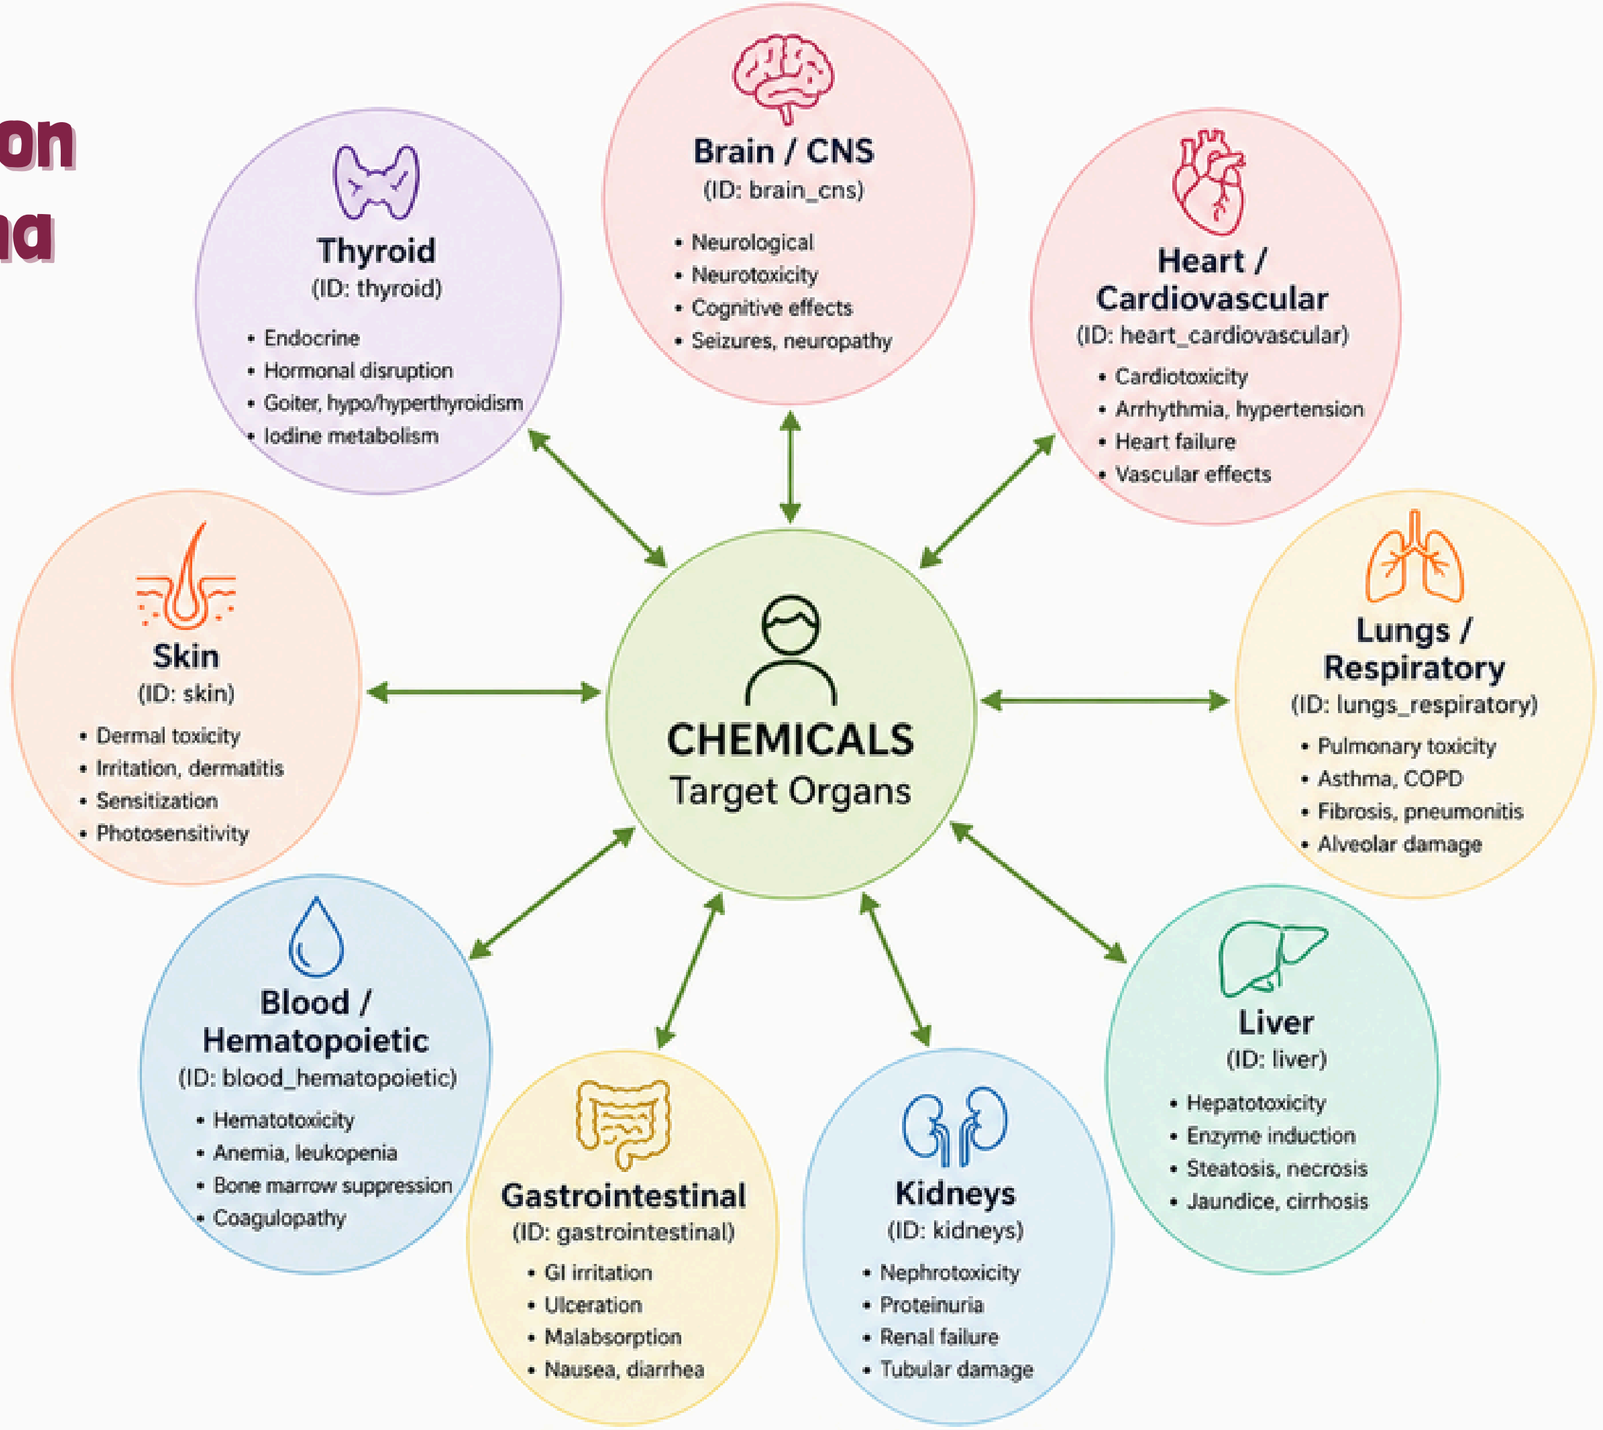

Graph Data

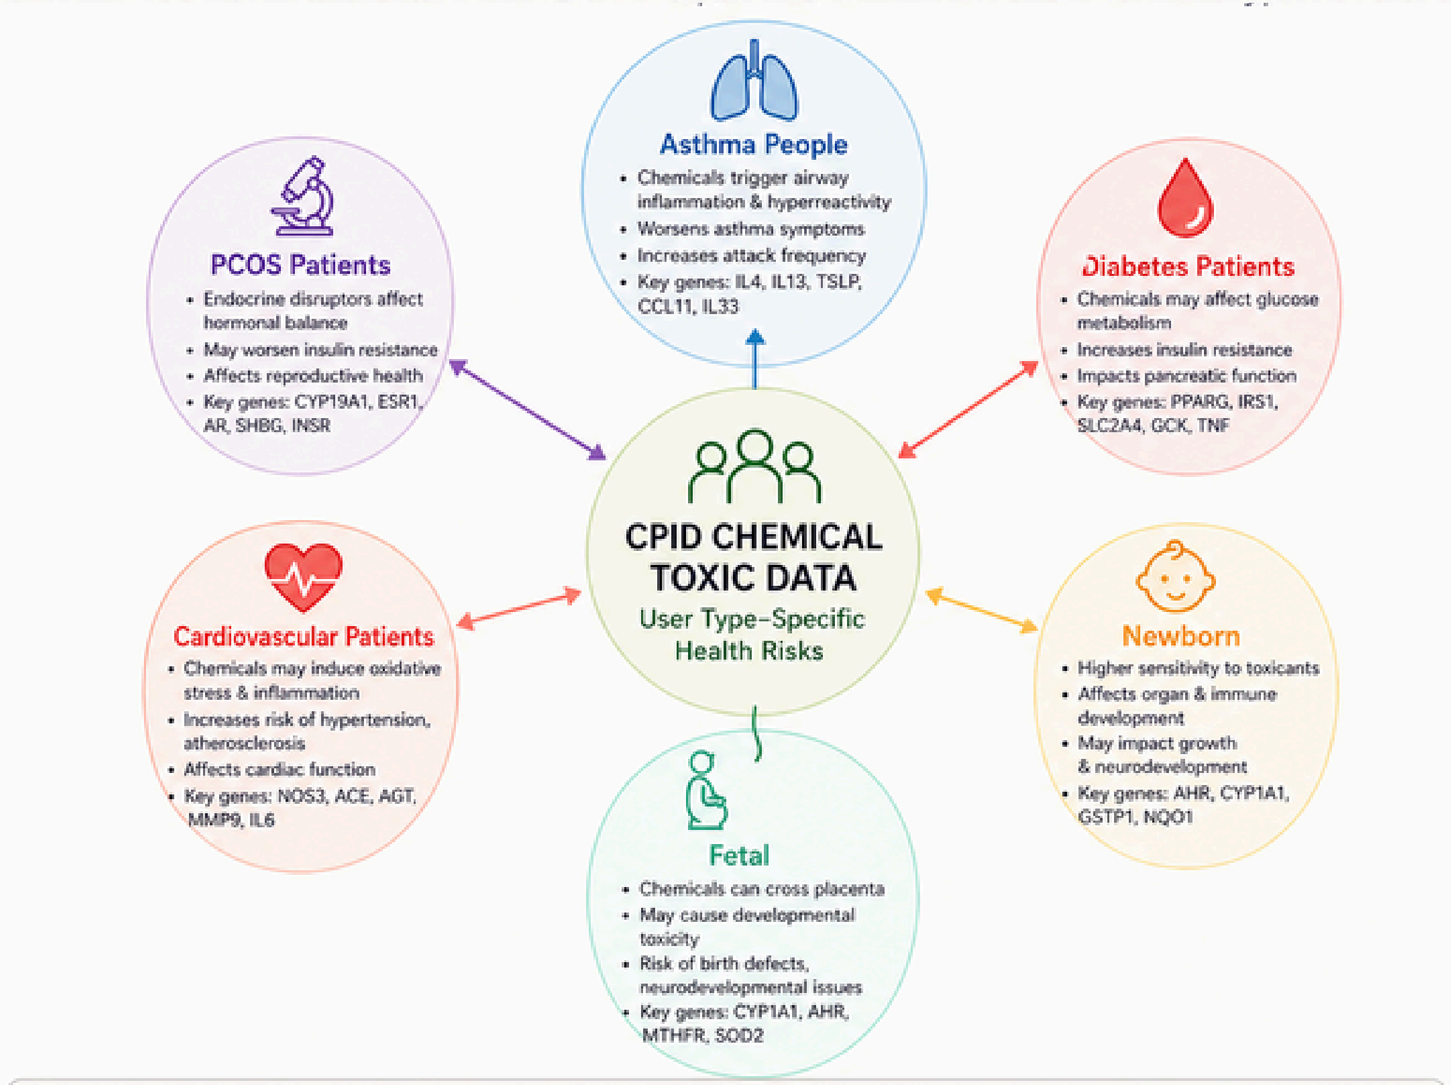

Knowledge Graph Shema

Risk estimation Server Shema

User Personalization Server Shema

Solution & Tech Used

AI Powered Mobile Application

Product detection and Scaning

Ingredient Extraction & Analysis

Personalized Risk Detection

Cumulative Effect Modeling

Optimized Product Recommendation

Predictive Usage Simulation

OVERDOSE

Instead of Reacting to disease , we enable prevention through biological awarness

We Move from product detection , to biological modeling to preventive guidance

Scientific Knowledge Graph
Mapping links between compounds, biological effect, toxicity

Interaction & Synergy Engine
Analyzes combinations of ingredients and compounds to detect harmful interactions and beneficial or risky synergies

AI-Driven Analytics
Uses AI insights to enhance recommendations and detect risks, with automation evolving over time.

Health Intelligence Dashboard
Advanced analytics dashboard for users to explore risks, and insights about the cumuative effect on their biology

PRODUCT INTELLIGENCE LAYER

Understanding the Product

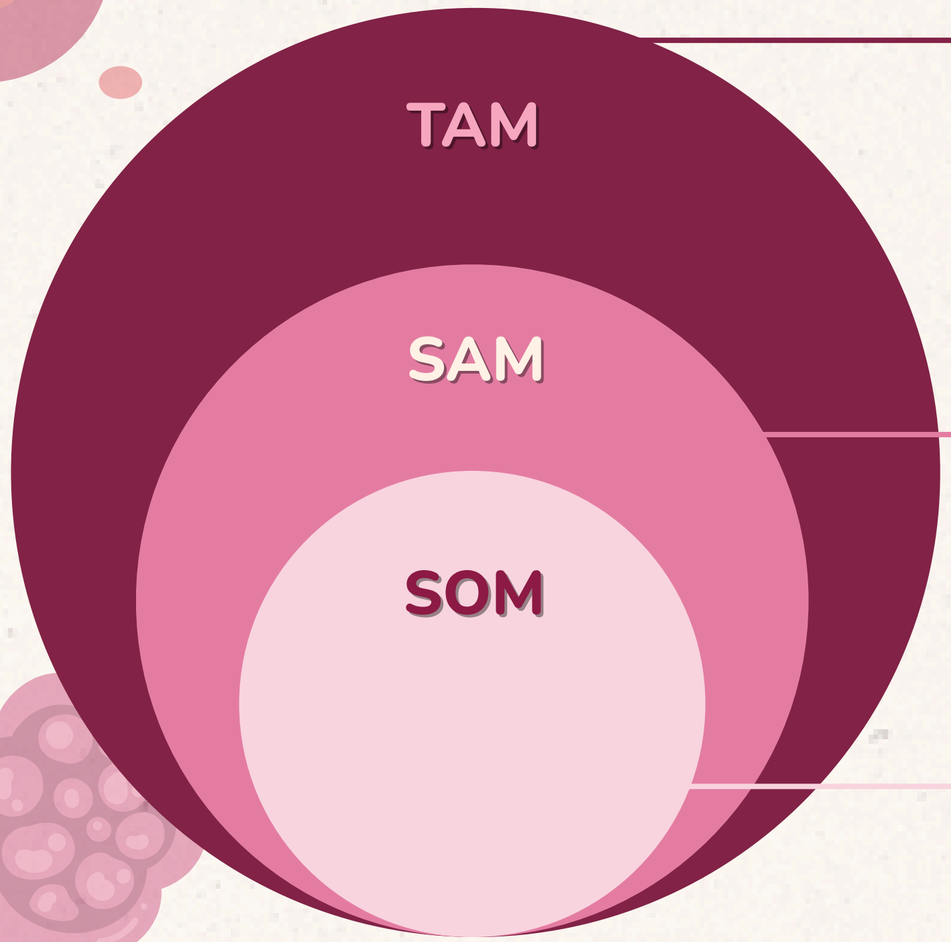

SCIENTIFIC INTELLIGENCE LAYER

Modeling the Biological Impact

DECISION & INTERACTION LAYER

Guiding the User

Market size

Total Adressable Market

The potential market demand

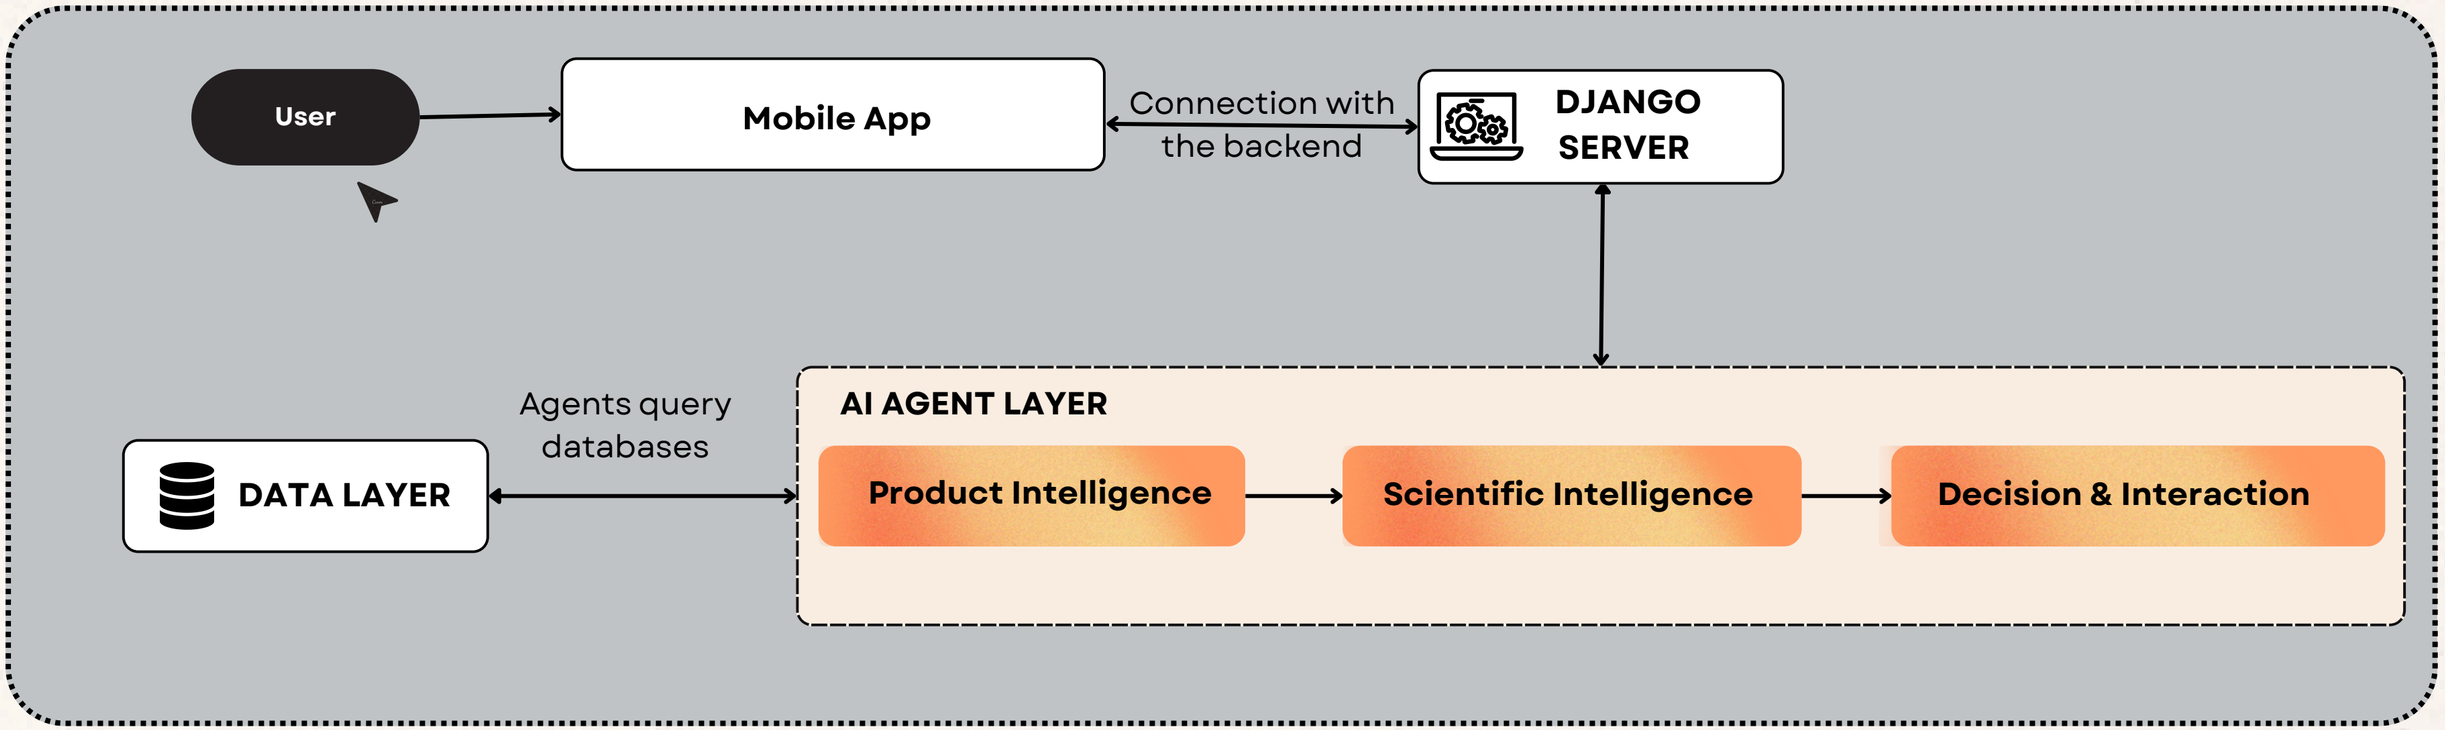

SERVICEABLE AVAILABLE MARKET

Who we can realistically serve

SERVICEABLE OBTAINABLE MARKET

Who we can realistically capture

Global Architecture

Business Model Canvas

So how does OVERDOSE work as a business?

Key Partner

- Influencers
- PubChem
- Open Beauty Facts
- Open Food Facts

yosr zaouali

Siwar Guinoubi

taieb Saied

Key Activities

- Product scanning (barcode, OCR, CV)
- Biological Intelligence Layer
- Safer product substitution
- AI-powered explainability

Key Resources

- AI engineers
- Neo4j knowledge graph
- Groq + Llama 3.3-70b
- PixelMind team

Value Proposition

- Cumulative cocktail analysis
- Personalized recommendations
- Transparent AI explanations

Custom Relationship

- Mobile Application
- Interactive dashboard
- Exposure history tracking

Channels

- Mobile app (barcode scan)
- API Gateway
- Social media campaigns

Customer Segments

- Parents (Newborns)
- Pregnant Womens
- PCOS Patient
- Cardiovascular

Cost Structure

- Cloud & API infrastructure
- AI development & maintenance
- Monitoring & updates

Revenue Streams

- Freemium / Premium subscription
- B2B brand partnerships

Revenue Stream

How we build this

B2C (consumer)

Freemium to Premium

App Subscriptions

first, Families where users can scan up to 100 products for free and get protection.

But premuim is where it become powerful full biological tracking, unlimited scans.

OVERDOSE

B2B (entreprise)

API Licensing & Centrification

brands paying for our Overdose Safe label certification.

It becomes a trust label for consumers and a competitive advantage for companies.

CHARTING THE FUTURE

Win Tunisia. Win the world.

Next 6 months

MVP live in Tunisia.

Next 12 months.

Every Tunisian family can access full features for free.

Next 24 months

Version 2 , more protection, more power.

Next 36 months

Overdose becomes the standard , right here in Tunisia.

Relevant SDGs
