

MARAM JEBALI

Jebali.Maram@esprit.tn | linkedin | github | Portfolio

Profile

Final-year Software Engineering student specialized in AI, with hands-on experience building intelligent systems across machine learning, computer vision, NLP, multimodal AI, RAG, multi-agent systems, and knowledge graphs. Seeking an end-of-study internship in AI Engineering to contribute to challenging technical problems and build reliable AI systems.

Education

Engineering Degree in Computer Science – AI Specialization

ESPRIT – Higher School of Engineering and Technology

2024 – 2027

Tunisia

Integrated Preparatory Cycle

ESPRIT – Higher School of Engineering and Technology

2022 – 2024

Experience

AI Intern – Multimodal Internal AI Assistant & Document Processing | Orange

Aug. - Sep. 2026

Tunisia

- Developed **Oli**, an internal **multimodal advanced RAG assistant** for Orange employees.
- Implemented a **VLM-based pipeline** for document preparation, cleaning, and vector-database ingestion.

Stack: Next.js, React, TypeScript, Vercel AI SDK, Qdrant, RAG, VLMs, OpenCV, Gemini, Groq, Mistral, PostgreSQL

Generative AI Intern – AI-Assisted Urban Planning Platform | Talan SummerCamp

Jul. - Aug. 2026

- Contributed to the **development and deployment of UrbanMAIND**, an **AI-assisted urban-planning platform** using **geospatial data** and French urban regulations for feasibility studies, macro-zoning, spatial reasoning, and project design.
- Implemented **LangGraph multi-agent workflows** for site analysis, **regulatory RAG**, feasibility assessment, and **2D mass planning**.

Stack: React, FastAPI, Mistral, LangGraph, ChromaDB, RAG, AI Agents, Geospatial APIs, PLU, GeoJSON, Vercel, Render

AI Intern – Autonomous Evaluation of Generated Content & Image Relevance | Value

Jun. - Jul. 2025

Tunisia

- Developed a **multimodal evaluation workflow** to assess generated tourism content and image relevance using multiple evaluation signals.
- Designed an **NLP polygon-radar metric** for generated tourism content using **LLM-as-a-Judge**, RAGAS, NLP analysis, and mathematical modeling.

Stack: Python, LLM-as-a-Judge, RAGAS, NLP, Multimodal Evaluation, LangChain, NumPy, Matplotlib

Selected Projects

OVERDOSE – AI-Based Chemical Exposure & Risk Analysis

Feb. 2026 – Present

- Contributed to an **AI assessment system** that analyzes chemical exposure across everyday products.
- Designed the **Biological Intelligence Layer**, implementing an **MCP Agent** that orchestrates six specialized servers.
- Integrated a **Neo4j Aura knowledge graph** for chemical knowledge retrieval and reasoning.
- Implemented capabilities for **combination analysis**, cumulative exposure, **risk ranking**, toxicity, and **synergistic-effect analysis**.

Stack: Python, MCP Server, Neo4j Aura, Knowledge Graphs, LLMs, Semantic Retrieval, Sentence Transformers

SAHHATEK – Intelligent Medical Guidance & Health Decision Support System

Sep. 2025 – Feb. 2026

- Designed the **multi-agent orchestration architecture** and implemented a **LangGraph-based system** combining specialized agents for medical guidance and information processing.
- Implemented a **RAG assistant** for medical misinformation correction and reliable responses, with **NLP-based symptom analysis** and patient guidance.

Stack: Python, Django, LangChain, LangGraph, RAG, NLP, LLMs, Multi-Agent Systems

DEEPSEA.AI – Marine Conservation AI Initiative

Jan. 2025 – Jun. 2025

- Contributed to a research-driven marine ecosystem monitoring platform by developing **CNN-based classification models**.

Stack: PyTorch, CNN, ANN, YOLO, Grad-CAM/XAI, RAG, Ollama, FAISS, Django

Technical Skills

AI/ML: Machine Learning, Deep Learning, PyTorch, TensorFlow, Scikit-learn, NLP, Computer Vision, Statistical Analysis, R

GenAI: LLMs, RAG, LangChain, LangGraph, Multi-Agent Systems, MCP, Transformers, Semantic Search

Programming: Python, SQL, Java, JavaScript, C, C++ **Data:** Pandas, NumPy, Power BI, SSIS, SSMS

Data/Infrastructure: Qdrant, Neo4j, PostgreSQL, FAISS, Git/GitHub

Certifications

NVIDIA: Fundamentals of Deep Learning (2024) • Gen AI with Diffusion Models (2025) • Building AI Agents with Multimodal Models (2025) • Anomaly Detection (2025) • Predictive Maintenance (2025)

Leadership & Languages

Workshop Instructor & Technical Mentor – DeepFlow AI Club (2024–Present)

Languages: French (C1), English (C1), Arabic (C1), German (A2)
